

FIRST OIL WELL
The first oil well, No. 1, Jules
Clement, was completed at
Brenner, 2 miles northwest
Sept. 21, 1901 by W. Scott
Haywood and Associates.
This was the start of the
vital Louisiana oil and gas
industry.

LE PREMI
PUITS DE PE
Le 21 septembre 1901
à 2 milles au nord-ouest
de Brenner, au puits n° 1 Jules
Clement, par W. Scott
Haywood et Associés.
C'est ainsi que commença
l'industrie pétrolière
et du gaz.

LOUISIANA

POPULAR ANNUAL FINANCIAL REPORT
FOR THE FISCAL YEAR ENDED JUNE 30, 2008

INTRODUCTION

The Popular Annual Financial Report (Popular Report) is prepared within six months after the close of each fiscal year end in accordance with R.S. 39:80(B) with the express purpose of providing a brief, objective, and easily understood analysis of the State's financial performance for the preceding year, as well as facilitating wide dissemination of the report to the public. It presents selected basic information about the State's revenues, expenditures, financial position, budget, service efforts, and performance. The information, presented in a non-technical format, is intended to summarize and explain the basic financial condition and the operations of the State for the fiscal year covered by the Comprehensive Annual Financial Report (CAFR) for the State of Louisiana.

The financial data presented in the "Government-wide Financial Analysis", "General Fund Balance Sheet", and "Unreserved and Undesignated General Fund Balance" sections of this report use the same accounting measurements and principles as the CAFR.

The CAFR is prepared in accordance with Generally Accepted Accounting Principles (GAAP) and is independently audited by the Office of the Legislative Auditor of the State of Louisiana. Conversely, this report is unaudited and includes financial data (in the "Government-wide Financial Analysis" section) that departs from GAAP since it does not include the entire GAAP reporting entity (such as discrete component units of the State) and includes only selected financial data. Additionally, the data found in the "Budgetary Information" section departs from GAAP because it is prepared on a non-GAAP budgetary basis.

A copy of the CAFR can be obtained on the Office of Statewide Reporting and Accounting Policy (OSRAP) website at www.doa.la.gov/osrap/cafr-2.htm.

ECONOMIC OUTLOOK

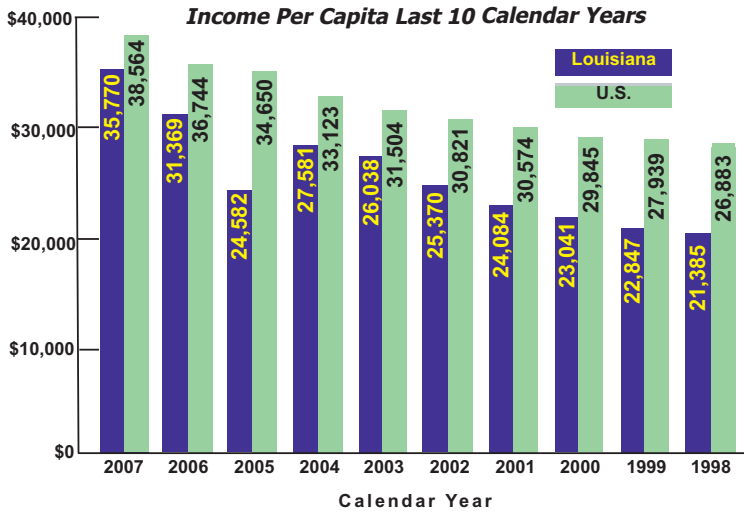

Hurricanes Katrina and Rita left indelible marks on individuals, businesses, and state and local governments when they struck in 2005. The recovery process accelerated the collection of sales taxes from people buying new appliances, new furniture, new clothes, and new vehicles; gaming revenues rose; the State's personal income tax collections rose; and oil and gas revenues also rose for fiscal years 2006 and 2007. The major concern after fiscal year 2007 was whether the revenue growth would continue, flatten out, or decline. The State's economy is always in motion, but several factors indicate that continued revenue increases should not be anticipated. These factors include (1) unrealistic expectations of the state getting a windfall from Hurricane Gustav in terms of revenue collections, (2) the weakening of oil prices, even in the aftermath of Hurricane Gustav, (3) passage by the state of several major tax cuts in the last two legislative sessions, and (4) the acknowledgment that sales tax collections from Katrina and Rita will continue to surge.

On December 15, 2008, the Revenue Estimating Conference met. It recognized that the U.S. is in a recession and that mineral prices had fallen substantially from their elevated level attained earlier this year. Consequently, the State's economic outlook has worsened, and the official revenue forecasts for both the current fiscal year and the next have been reduced significantly. The administration is addressing the anticipated budget shortfalls for both fiscal years. Even though the nation is in a recession, the State should see an overall employment growth rate of 0.1% or 1,300 jobs in 2009. By 2010, it is expected that the State will see an overall employment growth rate of 1.5% or 28,400 jobs and a real gross domestic product growth rate of 3.5%.

The following tables illustrate comparisons between Louisiana and the U.S. Although the State's median household income is below the national average, Louisiana experienced an increase of \$4,825 (13%) during 2007 while the national average rose only \$2,032 (4%). In 2007, the income per capita grew \$4,401 (14%), while the national average increased by only \$1,820 (5%). In addition, the State experienced its lowest unemployment rate in ten years, 3.8%.

BUDGETARY INFORMATION

Revenues - Budget to Actual by Source of Revenue - FY 08

Revenues:

The State of Louisiana is legally required to prepare a balanced annual budget, and all state agencies are required to adhere to the budget during the fiscal year. The accompanying graph depicts the budgeted and actual revenues and illustrates the performance of the State in adhering to the legally adopted revenue budget. The revenues are presented by source, which are mostly comprised of federal grants and various taxes. All budgeted funds, including the general fund, are included in the graph.

Expenditures:

While the revenue graph depicts the revenue budget by sources of revenue, the expenditure graph depicts budgeted and actual expenditures for the general fund, which is the chief operating fund of the State. The accompanying graph illustrates the budgeted and actual expenditures of the general fund by function of government. It also illustrates the State's performance in adhering to the legally adopted expenditures budget.

General Fund Expenditures - Budget to Actual by Function - FY 08

GOVERNMENT-WIDE FINA

Government-wide activities provide a broad overview of the State's finances similar to private-sector accounting. The government-wide activities presented here reflect the combined financial position and operating results of the State, not including fiduciary funds (such as pension funds) or discrete component units. Discrete component units are entities which the State has some accountability for and are required to be separately reported in the State's CAFR.

The Government-Wide Statements of the State reflect total assets of \$35 billion (\$2 billion more than last year) and total liabilities of approximately \$14 billion (a \$773 million increase). As a result, total net assets (total assets less total liabilities) equaled approximately \$21 billion at June 30, 2008, which is an increase of \$1 billion or 5% over the last year. The unrestricted net assets equaled \$1.6 billion at June 30, 2008, which is an increase of \$338 million from last year.

Revenues:

State revenue totaled \$29.6 billion in fiscal year 2007-2008. Fund balances and other state assets were also used to support government programs. The accompanying chart shows revenue by source. Federal grants (capital and operating grants) comprised 48% of the State's revenue and were earmarked for specific purposes.

Government-Wide Revenues

Government-Wide Expenses

Expenses:

On a government-wide basis, the State spent \$28.4 billion to provide services to Louisiana citizens. As depicted in the accompanying chart, general government represents the State's largest spending category accounting for 31% of the State's spending for the fiscal year. Health and welfare and education closely follow the largest spending category, accounting for 30% and 24% of the State's spending, respectively.

FEDERA

The federal government awards financial assistance to the State in the form of federal grants. Health and welfare programs have been consistently receiving the bulk of the financial assistance through federal grants, averaging \$5.9 billion per year for the past five years, followed secondly by general government and third by education, with an average of \$2.9 billion and \$1 billion per year for the past five years, respectively. In 2005, extensive damage occurred to Louisiana as a result of Hurricanes Katrina and Rita. Since that time, the federal government has aided Louisiana in its recovery by providing additional federal grants.

Federal Grant Revenue

(Expressed In Millions)

GENERA

Total general government expenditures for fiscal year 2008 totaled \$8.7 billion. Of that amount, the Division of Administration's Office of Community Development and the Governor's Office of Homeland Security and Emergency Preparedness comprised \$4.9 billion and \$1.1 billion of those expenditures, respectively.

The Community Development Block Grant, which is administered by the Office of Community Development, develops viable urban communities by providing decent housing, a suitable living environment, and expanding economic opportunities, principally for persons of low and moderate income; and the Governor's Office of Homeland Security and Emergency Preparedness is responsible for protecting the citizens of Louisiana by providing efficient and reliable communication during disaster operations, when time-sensitive information is vital for mission accomplishment.

The remaining \$2.7 billion of expenditures were comprised of costs associated with economic development of the State, statewide and local elections, environmental quality across the State, worker's compensation, workforce development, and the general costs to run the State, including salaries, benefits, and retirement funding costs for state employees.

GENERA

While the discussion on the government-wide financial statements shows the condition of the entire State, of special interest is the balance sheet of the General Fund, which is the chief operating fund of the State. The fund's assets of \$4.5 billion and obligations of \$2.9 billion leave a total fund balance of \$1.6 billion. Much of this balance (the "reserved fund balance" and the "designated fund balance") is usually reserved or designated for various specific purposes, while any remaining amount (the "unreserved and undesignated fund balance") is theoretically the amount left over after all of the State's obligations have been met.

For fiscal year 2008, the total available assets exceeded the total liabilities, reservations, and designations, resulting in a surplus of \$794 million, which is \$364 million less than the surplus in 2007. This reduction in surplus is due primarily to a decrease in income tax and miscellaneous tax revenues for the current fiscal year.

UNRESERVED/UNDESIGNA

One measure of the financial performance of the State is the comparison of the unreserved and undesignated fund balance (the surplus or deficit) of the general fund for the last several years. This fund balance is theoretically the amount "left over" after assets are compared against liabilities.

According to the Louisiana Constitution, any surplus can only be used for either: (1) capital construction, (2) retirement or defeasance of debt, (3) providing payments against the unfunded accrued liability of the public retirement systems, (4) providing for a deposit of 25% of any money designated as non-recurring revenue into the Budget Stabilization Fund, (5) providing for deposit into the Coastal Protection and Restoration Fund, and (6) providing for new highway construction for which federal matching funds are available.

As previously mentioned, fiscal year 2008 closed with the general fund having a surplus of \$794 million after some of the total fund balance was either reserved or designated. As of this printing, it is not known how this surplus will be used. The following table shows the general fund surpluses and deficits for the last 10 years and how any surpluses were spent.
