

ARCHITECTURAL SERVICES WANTED

Applications for ARCHITECTURAL Services for the following projects will be accepted until **2:00 p.m., Tuesday, June 30, 2026.**

(Your attention is called to the 2:00 p.m. deadline -- exceptions WILL NOT be made). Applications shall be submitted on the standard LSB - 1 (September 2019 edition) only, with no additional pages attached. Please be sure to use an up-to-date copy of the form. These forms are available at the Office of Facility Planning and Control and on the Selection Board page of the Facility Planning & Control website at <https://www.doa.la.gov/doa/fpc/selection-boards/>. Do not attach any additional pages to this application. **Applications with attachments in addition to the pre-numbered sheets or otherwise not following this format will be discarded.** One fully completed signed copy of each application shall be submitted. The copy may be printed and mailed or printed and delivered or scanned in PDF format and e-mailed. Printed submittals shall not be bound or stapled. E-mailed PDF copies, as well as printed copies, shall be received by Facility Planning & Control within the deadline stated above. The date and time the e-mail is received in the Microsoft Outlook Inbox at Facility Planning & Control shall govern compliance with the deadline for e-mailed applications. Timely delivery by whatever means is strictly the responsibility of the applicant. By e-mailing an application the applicant assumes full responsibility for timely electronic delivery. DO NOT submit both printed and e-mail copies. Any application submitted by both means will be discarded.

1. Waterproofing and Re-Roofing, Bienville Building, State Capitol Park, Baton Rouge, Louisiana, Project No. 01-107-26D-OFC, F.01004808.

This project consists of the removal and replacement of approximately 36,300 s.f. of roofing, along with associated building waterproofing, at the nine story Bienville Building, located in State Capitol Park in downtown Baton Rouge. The scope of work includes, but is not limited to, the removal of the existing modified bitumen roofing system down to the roof deck and installation of both un-tapered and tapered polyisocyanurate insulation and cover board as required to meet current energy code R-value requirements and to provide positive drainage. The project also includes installation of pre-finished metal flashings and liquid-applied flashings, as well as the removal and reinstallation of existing roof drain clamping rings and strainer baskets, with replacement as necessary. The new roofing system will consist of a State of Louisiana approved, two-ply SBS modified bitumen system, cold-applied, with a 20-year roofing system warranty. The Designer shall be responsible for evaluating and confirming the existing roof deck type, condition, and structural capacity to support the proposed roofing system, and for verifying that no active water infiltration is occurring within the building envelope. The design shall include the replacement and/or adjustment of rooftop equipment curbs and supports, as required, to accommodate existing rooftop-mounted systems, including piping, conduit, HVAC components, and lightning protection. The lightning protection system shall be evaluated and replaced as necessary. Window washing anchors shall be tested and replaced if found to be deficient. If compliant roof access is not currently provided, OSHA-compliant roof access ladders shall be included to facilitate safe access to the penthouse level. The waterproofing scope shall include exterior building cleaning and preparation, followed by the application of a spray-applied, clear waterproofing sealant to all masonry and concrete wall surfaces. Work shall also include the removal and replacement of deteriorated sealant joints and backer rods, as well as the replacement of window gaskets, vertical and horizontal metal facade joints, and door gaskets to ensure a continuous and watertight building envelope. In addition to the re-roof and waterproofing, the project shall include repair to an adjacent concrete ramp and deck to ensure structural integrity. The rear ADA ramp located at the southwest corner of the building shall be removed. The underlying substrate shall be prepared, properly compacted, and the ramp shall be reconstructed and repoured. The new work shall be correctly pinned to the adjacent walls to ensure long-term stability, as the existing ramp is exhibiting settlement and is currently unanchored on one side. The scope shall also include investigation of the rear concrete equipment deck which appears to be experiencing settlement as evidenced by displaced caulk joints and altered drain elevations.

Evaluation and recommended repairs shall be included as necessary to restore proper function and structural integrity. The building will remain occupied throughout the design and construction phases. All work shall be coordinated with the user agency and carefully scheduled to minimize disruption to building operations and occupants, including the transformer and generator housed on the equipment deck and the employee main entrance at the ADA ramp. The Designer is responsible for identifying and specifying any contractor provided and owner provided testing required for the project. If any owner provided testing laboratory services are required for the construction of the project, the Designer will obtain a minimum of three quotes for the engagement of a testing laboratory, with which the Designer will contract as a reimbursable expense. The Designer shall prepare and submit all required drawings to Facility Planning & Control in AutoCAD and hard copy. Drawings shall follow the format specified in the "Instructions to Designers for AutoCAD Drawings Submittal". The available funds for construction (AFC) are approximately **\$3,907,500.00** with a fee of approximately **\$284,450.00**. Contract design time is **300** consecutive calendar days; including **100** days review time. Thereafter, liquidated damages in the amount of **\$300.00** per day will be assessed. For questions related to the project please contact **Carrie Knight, Facility Planning & Control, carrie.knight@la.gov, (225) 219-4677**.

2. Plaquemine Readiness Center Modernization, Plaquemine, Louisiana, Project No. LA25-A-044.

This project consists of complete interior and exterior sustainment and renovation work at the Plaquemine Readiness Center. The 1957 Readiness Center is approximately 11,840 s.f. and the project scope includes, but is not limited to, renovation of interior offices, kitchen, classroom, storage, latrines, drill hall and associated spaces, replacement of interior and exterior openings, repairs to exterior facade, code improvements as required, new interior finishes and MEP system improvements. The Design will include all investigative site surveys as necessary including, but not limited to, topographic, geotechnical, survey, drainage and other investigations as required. Investigative services may be authorized as an increase to the Designer's fee. Design and construction will take into account that the building may remain occupied for the duration of the project. Design and construction of the project shall follow the Louisiana National Guard Guiding Principles, BABA and NG Pam 415-12, as well as all applicable local, state and federal codes. All design including building structure, envelope, roof, all associated exterior and interior finishes, interior and exterior signage, mechanical, electrical power and lighting, plumbing, with sprinkler, fire alarm, building controls management, security cameras, access control, and the infrastructure necessary for the installation and construction of these elements are to be included in the project. The Designer shall retain an accredited LDEQ Asbestos Inspector to complete an inspection of all suspect building materials that will be removed/impacted by this project as a reimbursable expense. If any materials are found to contain asbestos, the Designer shall provide, as part of their basic services, an accredited LDEQ Asbestos Designer to design the asbestos abatement specifications. If asbestos air monitoring will be required during abatement activities, the Designer will obtain an air-monitoring firm as a reimbursable expense. The Designer will survey the site for other hazardous materials and include in the specifications. If lead-based paint or mold inspections are required these will be provided as a reimbursable expense. If any materials are found to contain lead-based paint or mold, the Designer shall provide, as part of their basic services, an industrial hygienist to design the abatement specifications. Furniture, fixtures, equipment and data/telephone will be provided under separate contracts, although coordination of these items and systems with the work will be necessary on the part of the Designer. This project will require the services of an owner contracted third-party Commissioning Agent. The Designer will be required to coordinate with this separately contracted party, and the participation and oversight of the third-party Commissioning Agent is to be expected in all phases of the project. The project will require that the Designer utilize total performance methodology to confirm compliance with the provisions of the Louisiana State Energy Conservation Code. The Designer will be required to provide the analysis as an additional service, through self-performance if qualified, or via consultant as a reimbursable expense. Design services shall be limited to the Program Completion, Schematic Design, Design Development, Construction Documents and Bidding and Contracts (up to 65%) according to the Louisiana Capital Improvement Projects Procedure Manual for Design and Construction, 2020 Edition. The fee has been adjusted to account for this. At the owner's option the contract may be amended to include additional phases with the corresponding fee adjustment. This project will be administered by the Military Department and applicants should be thoroughly familiar with their requirements and procedures

before submitting an application. Any questions about these requirements and procedures should be directed to the Military Department. The Designer shall prepare and submit all required drawings to the Military in AutoCAD and hard copy. Drawings shall follow the format specified in the "Instructions to Designers for AutoCAD Drawings Submittal". The available funds for construction (AFC) are approximately **\$1,855,000.00** with a fee of approximately **\$102,282.00**. Contract design time is **180** consecutive calendar days; including **60** days review time. Thereafter, liquidated damages in the amount of **\$125.00** per day will be assessed. For questions related to the project please contact **Maj Scott Mucci, Military, scott.m.mucci.mil@army.mil**.

3. Bastrop Readiness Center Modernization, Bastrop, Louisiana, Project No. LA25-A-045.

This project consists of complete interior and exterior sustainment and renovation work at the Bastrop Readiness Center. The 1963 Readiness Center is approximately 12,455 s.f. and the project scope includes, but is not limited to, renovation of interior offices, kitchen, classroom, storage, latrines, drill hall and associated spaces, replacement of interior and exterior openings, repairs to exterior facade, code improvements as required, new interior finishes and MEP system improvements. The Design will include all investigative site surveys as necessary including, but not limited to, topographic, geotechnical, survey, drainage and other investigations as required. Investigative services may be authorized as an increase to the Designer's fee. Design and construction will take into account that the building may remain occupied for the duration of the project. Design and construction of the project shall follow the Louisiana National Guard Guiding Principles, BABA and NG Pam 415-12, as well as all applicable local, state and federal codes. All design including building structure, envelope, roof, all associated exterior and interior finishes, interior and exterior signage, mechanical, electrical power and lighting, plumbing, with sprinkler, fire alarm, building controls management, security cameras, access control, and the infrastructure necessary for the installation and construction of these elements are to be included in the project. The Designer shall retain an accredited LDEQ Asbestos Inspector to complete an inspection of all suspect building materials that will be removed/impacted by this project as a reimbursable expense. If any materials are found to contain asbestos, the Designer shall provide, as part of their basic services, an accredited LDEQ Asbestos Designer to design the asbestos abatement specifications. If asbestos air monitoring will be required during abatement activities, the Designer will obtain an air-monitoring firm as a reimbursable expense. The Designer will survey the site for other hazardous materials and include in the specifications. If lead-based paint or mold inspections are required these will be provided as a reimbursable expense. If any materials are found to contain lead-based paint or mold, the Designer shall provide, as part of their basic services, an industrial hygienist to design the abatement specifications. Furniture, fixtures, equipment and data/telephone will be provided under separate contracts, although coordination of these items and systems with the work will be necessary on the part of the Designer. This project will require the services of an owner contracted third-party Commissioning Agent. The Designer will be required to coordinate with this separately contracted party, and the participation and oversight of the third-party Commissioning Agent is to be expected in all phases of the project. The project will require that the Designer utilize total performance methodology to confirm compliance with the provisions of the Louisiana State Energy Conservation Code. The Designer will be required to provide the analysis as an additional service, through self-performance if qualified, or via consultant as a reimbursable expense. Design services shall be limited to the Program Completion, Schematic Design, Design Development, Construction Documents and Bidding and Contracts (up to 65%) according to the Louisiana Capital Improvement Projects Procedure Manual for Design and Construction, 2020 Edition. The fee has been adjusted to account for this. At the owner's option the contract may be amended to include additional phases with the corresponding fee adjustment. This project will be administered by the Military Department and applicants should be thoroughly familiar with their requirements and procedures before submitting an application. Any questions about these requirements and procedures should be directed to the Military Department. The Designer shall prepare and submit all required drawings to the Military in AutoCAD and hard copy. Drawings shall follow the format specified in the "Instructions to Designers for AutoCAD Drawings Submittal". The available funds for construction (AFC) are approximately **\$1,855,000.00** with a fee of approximately **\$102,282.00**. Contract design time is **180** consecutive calendar days; including **60** days review time. Thereafter, liquidated damages in the amount of **\$125.00** per day will be assessed. For questions related to the project please contact **Maj Scott Mucci, Military, scott.m.mucci.mil@army.mil**.

4. FMS 7 Modernization, Bogalusa, Louisiana, Project No. LA26-A-030.

This project consists of modernization to the existing 9,344 s.f. FMS 7 building in Bogalusa, originally constructed in 1992. The scope of work includes, but is not limited to, renovation of interior maintenance bays, offices, kitchen, classroom, storage, latrines, drill hall and associated spaces, replacement of interior and exterior openings, repairs to exterior facade, code improvements as required, new interior finishes and MEP system improvements. Construction of additional square footage may be authorized as required to meet the mission requirements for the unit. The design will include all investigative site surveys as necessary including, but not limited to, topographic, geotechnical, survey, drainage and other investigations as required. Investigative services may be authorized as an increase to the Designer's fee. Design and construction will take into account that the building may remain occupied for the duration of the project. Design and construction of the project shall follow the Louisiana National Guard Guiding Principles, BABA and NG Pam 415-12, as well as all applicable local, state and federal codes. All design including building structure, envelope, roof, all associated exterior and interior finishes, interior and exterior signage, mechanical, electrical power and lighting, plumbing, with sprinkler, fire alarm, building controls management, security cameras, access control, and the infrastructure necessary for the installation and construction of these elements are to be included in the project. The Designer shall retain an accredited LDEQ Asbestos Inspector to complete an inspection of all suspect building materials that will be removed/impacted by this project as a reimbursable expense. If any materials are found to contain asbestos, the Designer shall provide, as part of their basic services, an accredited LDEQ Asbestos Designer to design the asbestos abatement specifications. If asbestos air monitoring will be required during abatement activities, the Designer will obtain an air-monitoring firm as a reimbursable expense. The Designer will survey the site for other hazardous materials and include in the specifications. If lead-based paint or mold inspections are required these will be provided as a reimbursable expense. If any materials are found to contain lead-based paint or mold, the Designer shall provide, as part of their basic services, an industrial hygienist to design the abatement specifications. Furniture, fixtures, and equipment will be provided under separate contracts, although coordination of these items and systems with the work will be necessary on the part of the Designer. This project will require the services of an owner contracted third-party Commissioning Agent. The Designer will be required to coordinate with this separately contracted party, and the participation and oversight of the third-party Commissioning Agent is to be expected in all phases of the project. The project will require that the Designer utilize total performance methodology to confirm compliance with the provisions of the Louisiana State Energy Conservation Code. The Designer will be required to provide the analysis as an additional service, through self-performance if qualified, or via consultant as a reimbursable expense. Design services shall be limited to the Program Completion, Schematic Design, Design Development, Construction Documents and Bidding and Contracts (up to 65%) according to the Louisiana Capital Improvement Projects Procedure Manual for Design and Construction, 2020 Edition. The fee has been adjusted to account for this. At the owner's option the contract may be amended to include additional phases with the corresponding fee adjustment. This project will be administered by the Military Department and applicants should be thoroughly familiar with their requirements and procedures before submitting an application. Any questions about these requirements and procedures should be directed to the Military Department. The Designer shall prepare and submit all required drawings to the Military in AutoCAD and hard copy. Drawings shall follow the format specified in the "Instructions to Designers for AutoCAD Drawings Submittal". The available funds for construction (AFC) are approximately **\$1,846,153.00** with a fee of approximately **\$101,833.00**. Contract design time is **180** consecutive calendar days; including **60** days review time. Thereafter, liquidated damages in the amount of **\$125.00** per day will be assessed. For questions related to the project please contact **Maj Scott Mucci, Military, scott.m.mucci.mil@army.mil**.

5. AASF #2 Helipad Sustainment, Pineville, Louisiana, Project No. LA26-A-031.

This project consists of sustainment efforts to the existing 880 s.f. AASF #2 paved helipad space at Esler Field in Pineville, originally constructed in 1998. The scope of work includes, but is not limited to, demolition of existing paving and subsurface work as necessary to provide for new paved helipad with all required subsurface work, reinforcing, grading to provide positive drainage, electricity, lighting, and striping. The design will

include all investigative site surveys as necessary including, but not limited to, topographic, geotechnical, survey, drainage and other investigations as required. Investigative services may be authorized as an increase to the Designer's fee. Design and construction of the project shall follow the Louisiana National Guard Guiding Principles, BABA and NG Pam 415-12, as well as all applicable local, state and federal codes. All design including exterior finishes, exterior signage, electrical power and lighting, and the infrastructure necessary for the installation and construction of these elements are to be included in the project. Design services shall be limited to the Program Completion, Schematic Design, Design Development, Construction Documents and Bidding and Contracts (up to 65%) according to the Louisiana Capital Improvement Projects Procedure Manual for Design and Construction, 2020 Edition. The fee has been adjusted to account for this. At the owner's option the contract may be amended to include additional phases with the corresponding fee adjustment. This project will be administered by the Military Department and applicants should be thoroughly familiar with their requirements and procedures before submitting an application. Any questions about these requirements and procedures should be directed to the Military Department. The Designer shall prepare and submit all required drawings to the Military in AutoCAD and hard copy. Drawings shall follow the format specified in the "Instructions to Designers for AutoCAD Drawings Submittal". The available funds for construction (AFC) are approximately **\$1,500,000.00** with a fee of approximately **\$76,483.00**. Contract design time is **180** consecutive calendar days; including **60** days review time. Thereafter, liquidated damages in the amount of **\$125.00** per day will be assessed. For questions related to the project please contact **Maj Scott Mucci, Military, scott.m.mucci.mil@army.mil**.

6. Third Floor Offices Renovation, Building 35, Jackson Barracks, New Orleans, Louisiana, Project No. LA26-A-035.

This project consists of complete interior renovation of approximately 23,450 s.f. of the third floor of Building 35 at Jackson Barracks. The building was opened in 1993. The scope of work includes, but is not limited to, demolition of existing interior office and conference type spaces, renovation of latrines, construction of approximately 40 new office spaces, new common work spaces to serve approximately 43, break room, storage, meeting rooms and associated spaces, code improvements as required, new interior finishes and MEP system replacement/improvements as required. The Design will include all investigative site surveys as necessary including, but not limited to, topographic, geotechnical, survey, drainage and other investigations as required. Investigative services may be authorized as an increase to the Designer's fee. Design and construction will take into account that the building may remain occupied for the duration of the project. Design and construction of the project shall follow the Louisiana National Guard Guiding Principles, BABA and NG Pam 415-12, as well as all applicable local, state and federal codes. All design including building structure, envelope, roof, all associated exterior and interior finishes, interior and exterior signage, mechanical, electrical power and lighting, plumbing, with sprinkler, fire alarm, building controls management, security cameras, access control, and the infrastructure necessary for the installation and construction of these elements are to be included in the project. The Designer shall retain an accredited LDEQ Asbestos Inspector to complete an inspection of all suspect building materials that will be removed/impacted by this project as a reimbursable expense. If any materials are found to contain asbestos, the Designer shall provide, as part of their basic services, an accredited LDEQ Asbestos Designer to design the asbestos abatement specifications. If asbestos air monitoring will be required during abatement activities, the Designer will obtain an air-monitoring firm as a reimbursable expense. The Designer will survey the site for other hazardous materials and include in the specifications. If lead-based paint or mold inspections are required these will be provided as a reimbursable expense. If any materials are found to contain lead-based paint or mold, the Designer shall provide, as part of their basic services, an industrial hygienist to design the abatement specifications. Furniture, fixtures, equipment and data/telephone will be provided under separate contracts, although coordination of these items and systems with the work will be necessary on the part of the Designer. This project will require the services of an owner contracted third-party Commissioning Agent. The Designer will be required to coordinate with this separately contracted party, and the participation and oversight of the third-party Commissioning Agent is to be expected in all phases of the project. The project will require that the Designer utilize total performance methodology to confirm compliance with the provisions of the Louisiana State Energy Conservation Code. The Designer will be required to provide the analysis as an additional service, through self-performance if qualified, or via consultant as a reimbursable

expense. This project will be administered by the Military Department and applicants should be thoroughly familiar with their requirements and procedures before submitting an application. Any questions about these requirements and procedures should be directed to the Military Department. The Designer shall prepare and submit all required drawings to the Military in AutoCAD and hard copy. Drawings shall follow the format specified in the "Instructions to Designers for AutoCAD Drawings Submittal". The available funds for construction (AFC) are approximately **\$1,400,000.00** with a fee of approximately **\$121,483.00**. Contract design time is **180** consecutive calendar days; including **60** days review time. Thereafter, liquidated damages in the amount of **\$125.00** per day will be assessed. For questions related to the project please contact **Laura Cooper, Military, laura.h.cooper2.nfg@army.mil**.

7. Clarks Readiness Center Sustainment, Clarks, Louisiana, Project No. LA26-A-032.

This project consists of complete interior and exterior sustainment and renovation work at the Clarks Readiness Center. The 1986 Readiness Center is approximately 18,608 s.f. and the project scope includes, but is not limited to, renovation of interior offices, kitchen, classroom, storage, latrines, drill hall and associated spaces, replacement of interior and exterior openings, repairs to exterior facade, code improvements as required, new interior finishes and MEP system improvements. The Design will include all investigative site surveys as necessary including, but not limited to, topographic, geotechnical, survey, drainage and other investigations as required. Investigative services may be authorized as an increase to the Designer's fee. Design and construction will take into account that the building may remain occupied for the duration of the project. Design and construction of the project shall follow the Louisiana National Guard Guiding Principles, BABA and NG Pam 415-12, as well as all applicable local, state and federal codes. The Designer shall retain an accredited LDEQ Asbestos Inspector to complete an inspection of all suspect building materials that will be removed/impacted by this project as a reimbursable expense. If any materials are found to contain asbestos, the Designer shall provide, as part of their basic services, an accredited LDEQ Asbestos Designer to design the asbestos abatement specifications. If asbestos air monitoring will be required during abatement activities, the Designer will obtain an air-monitoring firm as a reimbursable expense. The Designer will survey the site for other hazardous materials and include in the specifications. If lead-based paint or mold inspections are required these will be provided as a reimbursable expense. If any materials are found to contain lead-based paint or mold, the Designer shall provide, as part of their basic services, an industrial hygienist to design the abatement specifications. Furniture, fixtures, equipment and data/telephone will be provided under separate contracts, although coordination of these items and systems with the work will be necessary on the part of the Designer. This project will require the services of an owner contracted third-party Commissioning Agent. The Designer will be required to coordinate with this separately contracted party, and the participation and oversight of the third-party Commissioning Agent is to be expected in all phases of the project. The project will require that the Designer utilize total performance methodology to confirm compliance with the provisions of the Louisiana State Energy Conservation Code. The Designer will be required to provide the analysis as an additional service, through self-performance if qualified, or via consultant as a reimbursable expense. Design services shall be limited to the Program Completion, Schematic Design, Design Development, Construction Documents and Bidding and Contracts (up to 65%) according to the Louisiana Capital Improvement Projects Procedure Manual for Design and Construction, 2020 Edition. The fee has been adjusted to account for this. At the owner's option the contract may be amended to include additional phases with the corresponding fee adjustment. This project will be administered by the Military Department and applicants should be thoroughly familiar with their requirements and procedures before submitting an application. Any questions about these requirements and procedures should be directed to the Military Department. The Designer shall prepare and submit all required drawings to the Military in AutoCAD and hard copy. Drawings shall follow the format specified in the "Instructions to Designers for AutoCAD Drawings Submittal". The available funds for construction (AFC) are approximately **\$1,390,000.00** with a fee of approximately **\$78,446.00**. Contract design time is **180** consecutive calendar days; including **60** days review time. Thereafter, liquidated damages in the amount of **\$125.00** per day will be assessed. For questions related to the project please contact **Maj Scott Mucci, Military, scott.m.mucci.mil@army.mil**.

GENERAL REQUIREMENTS APPLICABLE TO ALL PROJECTS:

Applicants are advised that design time ends when the Documents are "complete, coordinated and **ready for bid**" as stated in to Article 3.3.1 (4) of the Capital Improvements Projects Procedure Manual for Design and Construction. Documents will be considered to be "complete, coordinated and ready for bid" only if the advertisement for bid can be issued with no further corrections to the Documents. Design time will not necessarily end at the receipt of the initial Construction Documents Phase submittal by Facility Planning and Control. Any re-submittals required to complete the documents will be included in the design time.

In addition to the statutory requirements, professional liability insurance covering the work involved will be required in an amount specified in the following schedule. This will be required at the time the Designer's contract is signed. Proof of coverage will be required at that time.

SCHEDULE

LIMITS OF PROFESSIONAL LIABILITY

<u>Construction Cost</u>	<u>Limit of Liability</u>
\$0 to \$10,000,000	\$1,000,000
\$10,000,001 to \$20,000,000	\$1,500,000
\$20,000,001 to \$50,000,000	\$3,000,000
Over \$50,000,000	To be determined by Owner

Applicant firms should be familiar with the above stated requirements prior to application. The firm(s) selected for the project(s) will be required to sign the State's standard Contract Between Owner and Designer. When these projects are financed either partially or entirely with Bonds, the award of the contract is contingent upon the sale of bonds or the issuance of a line of credit by the State Bond Commission. The State shall incur no obligation to the Designer until the Contract Between Owner and Designer is fully executed.

Firms will be expected to have all the expertise necessary to provide all architectural services required by the Louisiana Capital Improvement Projects Procedure Manual for Design and Construction for the projects for which they are applying. Unless indicated otherwise in the project description, there will be no additional fee for consultants.

Facility Planning and Control is a participant in the Small Entrepreneurship Program (the Hudson Initiative) and applicants are encouraged to consider participation. Information is available from the Office of Facility Planning and Control or on its website at <https://www.doa.la.gov/doa/fpc/>.

Applications shall be delivered or mailed or emailed to:
LOUISIANA ARCHITECTURAL SELECTION BOARD
c/o FACILITY PLANNING AND CONTROL

E-Mail:

selection.board@la.gov

Use this e-mail address for applications only. Do not send any other communications to this address.

Mail:

Post Office Box 94095

Baton Rouge, LA 70804-9095

Deliver:

1201 North Third Street

Claiborne Office Building

**Seventh Floor, Suite 7-160
Baton Rouge, LA 70802**

The meeting date for the Louisiana Architectural Selection Board is **Wednesday, July 15, 2026 at 10:00 AM** in room **1-100 Louisiana Purchase Room** of the Claiborne Building, 1201 North Third Street, Baton Rouge, LA 70802.

If you have a disability and would like to request an accommodation in order to participate in this meeting, please contact Cheryl Schilling at Cheryl.Schilling@la.gov or (225) 342-6060 as soon as possible but no later than 48 hours before the scheduled meeting.
