EDUCATION

Part LXXIII. Bulletin 109—Family and Consumer Sciences Content Standards Curriculum Framework

Chapter 1. Education

§101. Mission and Goals of the State Board of Elementary and Secondary Education (SBESE)

A. As part of the scope of education in Louisiana, Family and Consumer Sciences Education embraces the mission and goals of education as adopted by the State Board of Elementary and Secondary Education.

1. The Board of Elementary and Secondary Education pledges its commitment to the proposition that every child is valued and every child will learn.

 $2\square$ \square n order that we may honor this commitment, the board will aggressively pursue new and different ideas, develop a strong systemic process for change, and dedicate our energies and resources to that mission.

3. The board recognizes that education is an on-going process in which learning is the constant and time is the variable. It is for this reason that we propose and adopt the following goals that we believe will help chart the course for every child in Louisiana:

- a. focus on the early years;
- b. prepare students for the workplace;
- c. increase literacy, reduce dropouts;
- d. support teachers;
- e. support children and families;
- f. provide performance based accountability.

B. The mission and goals of education in Louisiana are achieved in part through implementation of the Louisiana Content Standards Foundation Skills and of the Information Literacy Model for Lifelong Learning.

AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2701 (December 2003).

§103. Louisiana Content Standards Foundation Skills

A. The Louisiana Content Standards Task Force has developed the following foundation skills which should apply to all students in all disciplines.

1. Communication: A process by which information is exchanged and a concept of "meaning" is created and shared between individuals through a common system of symbols, signs, or behavior. Students should be able to communicate clearly, fluently, strategically, technologically, critically, and creatively in society and in a variety of workplaces. This process can best be accomplished through use of the following skills: reading, writing, speaking, listening, viewing, and visually representing.

2. Problem Solving: The identification of an obstacle or challenge and the subsequent application of knowledge and thinking processes, which include reasoning, decision making, and inquiry, in order to reach a solution using multiple pathways, even when no routine path is apparent.

3. Resource Access and Utilization: The process of identifying, locating, selecting, and using resource tools to help in analyzing, synthesizing, and communicating information. The identification and employment of appropriate tools, techniques, and technologies are essential to all learning processes. These resource tools include pen, pencil, and paper; audio/video materials; word processors; computers; interactive devices; telecommunication; and other emerging technologies.

4. Linking and Generating Knowledge: The effective use of cognitive processes to generate and link knowledge across the disciplines and in a variety of contexts. In order to engage in the principles of continual improvement, students must be able to transfer and elaborate on these processes. "Transfer" refers to the ability to apply a strategy or content knowledge effectively in a setting or context other than that in which it was originally learned. "Elaboration" refers to monitoring, adjusting, and expanding strategies into other contexts.

5. Citizenship: The application of the understanding of the ideals, rights, and responsibilities of active participation in a democratic republic that includes working respectfully and productively together for the benefit of the individual and the community; being accountable for one's choices and actions and understanding their impact on oneself and others; knowing one's civil, constitutional, and statutory rights; and mentoring others to become productive citizens and lifelong learners.

AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2702 (December 2003).

§105. Information Literacy Model for Lifelong Learning

A. Students must become competent and independent users of information to be productive citizens of the 21st century. They must be prepared to live in an information-rich and changing global society. With the rapid growth of

technology, the amount of information available is accelerating so quickly that teachers no longer are able to impart a complete knowledge base in a subject area. In addition, students entering the workforce must know how to access information, solve problems, make decisions, and work as part of a team.

B. Therefore, information literacy, the ability to recognize an information need and then locate, evaluate, and effectively use the needed information, is a basic skill essential to the 21st century workplace and home. Information literate students are self-directed learners who, individually or collaboratively, use information responsibly to create quality products and to be productive citizens. Information literacy skills must not be taught in isolation; they must be integrated across all content areas, utilizing fully the resources of the classroom, the school library media center, and the community. The Information Literacy Model for Lifelong Learners is a framework that teachers at all levels can apply to help students become independent lifelong learners.

1. Defining/Focusing: The first task is to recognize that an information need exists. Students make preliminary decisions about the type of information needed based on prior knowledge.

2. Selecting Tools and Resources: After students decide what information is needed, they then develop search strategies for locating and accessing appropriate, relevant sources in the school library media center, community libraries and agencies, resource people, and others as appropriate.

3. Extracting and Recording: Students examine the resources for readability, currency, usefulness, and bias. This task involves skimming or listening for key words, "chunking" reading, finding main ideas, and taking notes.

4. Processing Information: After recording information, students must examine and evaluate the data to use the information retrieved. Students must interact with the information by categorizing, analyzing, evaluating, and comparing for bias, inadequacies, omissions, errors, and value judgments. Based on their findings, they either move on to the next step or do additional research.

5. Organizing Information: Students effectively sort, manipulate, and organize the information that was retrieved. They make decisions on how to use and communicate their findings.

6. Presenting Findings: Students apply and communicate what they have learned (e.g., research report, project, illustration, dramatization, portfolio, book, book report, map, oral/audio/visual presentation, game, bibliography, hyperstack).

7. Evaluating Efforts: Throughout the information problem-solving process, students evaluate their efforts. This evaluation assists students in determining the effectiveness of the research process. The final product may be evaluated by the teacher and also other qualified or interested resource persons. AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2702 (December 2003).

Chapter 3. Family and Consumer Sciences in Louisiana

§301. Introduction

A. Family and Consumer Sciences Education is a broad, comprehensive curriculum that enables individuals to function effectively as consumers, homemakers, parents, and employees or employers and to balance these roles successfully. It empowers individuals and families across the life span to manage the challenges of living and working in a diverse, global society. The unique focus is on families, work, and their interrelationships. Instruction strengthens basic academic skills in language arts, mathematics, science, and social studies and develops critical thinking skills through practical applications in real-life situations. Students gain a wide range of transferable skills that prepare them for multiple roles in today's society. The curriculum also allows entrance into the job market with the flexibility to function in new and emerging occupations. Through mastery of the key concepts (standards) and skills (benchmarks) outlined in this framework, students will become accomplished problem-solvers and informed decision makers. They will also be able to assume their places in the family and in the economic workforce as effective producers and consumers. Students of this state will also gain the skills needed to become lifelong learners.

AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2703 (December 2003).

§303. Mission and Goals

A. The mission of Family and Consumer Sciences Education is to prepare students for family, work, and careers by providing opportunities to develop the knowledge, skills, attitudes, and behaviors needed for:

1. strengthening the well-being of individuals and families across the life span;

2. becoming responsible citizens and leaders in family, community, and work settings;

3. promoting optimal nutrition and wellness across the life span;

4. managing resources to meet the needs of individuals and families;

5. balancing personal, home, family, and work lives;

6. using critical and creative thinking skills to address problems in diverse family, community, and work environments;

7. achieving successful life management, employment, and career development;

8. functioning effectively as providers and consumers of goods and services; and

9. appreciating human worth and accepting responsibility for one's actions and successes in family and work life.

AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2703 (December 2003).

§305. Description of Framework

A. In this document, framework refers to the entire field of Family and Consumer Sciences. A strand is the name of one of the five fields of study:

- 1. clothing and textiles;
- 2. housing, interiors, and furnishings;
- 3. human development and family relationships;
- 4. management of resources;
- 5. nutrition and foods.

B. The focus of each strand explains the discipline's importance to the overall education of students. The standards are descriptions of what a student should know and be able to do through subject matter, knowledge, and proficiencies gained as a result of studying that strand. Some strands have as many as 40 standards. Each standard is accompanied by benchmarks that identify processes and/or content that are used as a reference to assess student progress for the related standard. Curriculum was not addressed during the development of this framework. Each school system should assume responsibility for developing the local curriculum, using this document and the benchmarks in particular, as a guide. Content, instruction, and assessment methods should be approached by the individual teacher at the school level, based upon the approved curriculum. The relationship of each of these components is illustrated in the generic framework and the sample framework from Clothing and Textiles.

AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2703 (December 2003).

§307. Purpose and Development

A. This framework document articulates, organizes, and integrates the content and processes of Family and Consumer Sciences. Further, it establishes standards for Louisiana Family and Consumer Sciences Education programs, defines the parameters of the FACS discipline, and provides a guide for curriculum writers to use in developing sound programs in Family and Consumer Sciences. The standards are designed to develop students' comprehension, knowledge, and competence.

B. In 1997, the National Association of State Administrators of Family and Consumer Sciences (NASAFACS), in partnership with the Vocational Consortium offsets (V-TECS) and Southern Association of Colleges and Schools (SACS), provided leadership to the national standards project including research, development, validation/verification, implementation strategies, and dissemination phases.

C. The Louisiana FACS Content Standards Committee, comprised of FACS teachers, teacher-educators, and state and local supervisors, used the National Family and Consumer Sciences standards as a basis for Louisiana's standards. First, the national standards and benchmarks were adapted to meet the needs of Louisiana's educational goals. The benchmarks were then cross-referenced to academic content standards and to the Louisiana Content Standards Foundation Skills.

D. The resulting framework uses the national standards to provide a unifying structure of course content, while maintaining sufficient flexibility to permit adaptability within local districts for the development of curriculum.

AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2703 (December 2003).

§309. Intended Audiences and Use

A. This framework is intended to be used by teachers and curriculum developers to plan curriculum, instruction, and assessment for teachers and students. It also serves as a general reference to the basic principles of Family and Consumer Sciences:

1. for teachers and curriculum developers: a guide for planning curriculum, instruction, and assessment;

2. for parents: a means of assessing the effectiveness of their children's Family and Consumer Sciences education;

3. for administrators, supervisors, and school board members: an insight for planning resource allocations, material purchases, local curriculum development, and teachers' professional development;

4. for policy makers and state education staff: a basis for developing laws, policies, and funding priorities to support local reforms;

5. for staff developers: a basis for creating professional development materials and strategies designed to increase teachers' knowledge of Family and Consumer Sciences content, teaching methodologies, and assessment strategies;

6. for colleges and universities: a guide for content and design of teacher preparation programs; and

7. for business and industry leaders and government agencies: a basis for developing effective partnerships and local reforms for funding instructional materials and professional development.

AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

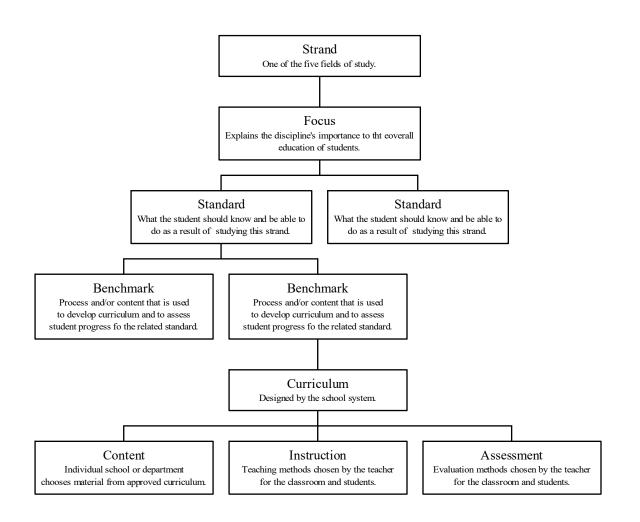

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2704 (December

2003).

§507. Strand: Human Development and Family Relationships

A. Focus

1. Integrate multiple life roles to enable individuals to connect family, community, and career responsibilities.

2. Promote optimal growth and development of self, family members, and others across the life span.

3. Analyze how the well-being of individuals and society is dependent upon the family.

4. Demonstrate respectful and caring relationships in the family, community and workplace.

5. Analyze parenting roles and responsibilities and their impact on strengthening the well-being of individuals and families.

6. Develop practices that promote optimal growth and development of children.

B. Standards

1. Analyze human growth and development across the life span.

illness. (3)	SE-D1,2		
4. Utilize the Hazard			
Analysis Critical			
Control Point			
(HACCP) during all			
food handling			
processes as a			
method for			
minimizing the risk			
of food borne illness.			
(4)			
5. Practice good			
personal			
hygiene/health			
procedures when			
handling food.			
6. Develop			
procedures for			
receiving and storage			
of raw and prepared			
foods. (4)			
7. Describe current			
types of cleaning			
materials and			
sanitizers and their			
proper use. (4)			
8. Apply OSHA's			
Right to Know Law			
and Material Safety			
Data Sheets (MSDS)			
and explain their			
requirements in			
handling hazardous			
materials. (4)			
9. Carry out waste			
disposal and			
recycling methods.			
(4)			

12. Utilize current technology in food product development.

§513. Academic Cross-Reference Codes

A.1. Cross-references to academic content standards reinforce the integration of academic and Family and Consumer Sciences skills. English Language Arts, Mathematics, Science, and Social Studies academic standards are cross-referenced in the second and third column beside each Family and Consumer Sciences standard. The academic standards are listed in full in the Appendices. The framework also references the five Louisiana Foundation Skills developed by the Louisiana Content Standards Task Force; these skills, which apply to all students in all disciplines, are:

- a. communication;
- b. problem solving;
- c. resource access and utilization;
- d. linking and generating knowledge; and
- e. citizenship.

2. Codes used in the framework to identify the academic standards are given below, as well as a sample page from the framework.

B. ELA (English Language Arts). Standard number is given; then benchmark number

C. Mathematics. Strand letter is given; then benchmark number

- N Number and Number Relations Strand
- A Algebra Strand
- M Measurement Strand G Geometry Strand
- D Data, Discrete Math, and Probability Strand
- P Patterns, Relations, and Functions Strand
- D. Science. Strand letter is given; then benchmark letter and number

SI Science As Inquiry Strand

PSPhysical Science Strand

- LS Life Science Strand
- SE Science and the Environment Strand

E. Social Studies. Strand letter is given; then benchmark letter and number

- G Geography Strand
- C Civics Strand
- E Economics Strand
- H History Strand

F. Example:

Standard Seven: Demonstrate design ideas through visual presentation.

§515. Referenced Academic Content Standards

A. The following is a list of the content standards and benchmarks that have been referenced in this document. All referenced content area standards and benchmarks are for students in grades 9-12.

B. English Language Arts (ELA)

Standard One: Students read, comprehend, and respond to a variety of materials for a variety of purposes.

1—Using knowledge of word meaning and extending basic and technical vocabulary, employing a variety of strategies.

2—Analyzing the effects of complex literary devices and complex elements on a selection.

3-Reading, responding to, and critiquing written, spoken, and visual texts.

4—Interpreting texts to generate connections to reallife situations.

5—Applying reading strategies to achieve a variety of objectives.

Standard Two: Students write competently for a variety of purposes and audiences.

1—Writing a composition of complexity that clearly implies a central idea with supporting details in a logical, sequential order.

2—Focusing on information, concepts, and ideas that show an awareness of an intended audience and/or purpose.

3—Applying the steps of the writing process, emphasizing revising and editing in final drafts.

4—Using narration, description, exposition, and persuasion to develop various modes of writing.

5—Recognizing and applying literary devices and various stylistic elements.

6—Responding to text and life experiences as a basis for writing.

Standard Three: Students communicate using conventional grammar, usage, sentence structure, punctuation, capitalization, spelling, and handwriting.

1—Writing legibly.

2—Demonstrating a command of the grammatical and mechanical conventions of standard English.

3—Spelling and pronouncing correctly using resources

Standard Four: Students demonstrate competence in speaking and listening as tools for learning and communicating.

1—Speaking intelligibly.

2—Giving and following directions/procedures.

3—Demonstrating a command of the features of speaking when giving prepared and extemporaneous presentations.

4—Speaking and listening for a variety of audiences and purposes.

5-Listening and responding to a wide variety of media.

6—Participating in a variety of roles in group discussions.

Standard Five: Students locate, select, and make use of information from a variety of texts, media, references, and technological sources.

1—Recognizing and using organizational features of printed text, other media, and electronic information.

2-Locating and evaluating information sources.

3—Accessing information and conducting research using outlining, note taking, summarizing, interviewing, and surveying to produce documented texts and graphics.

4—Using available technology to produce, revise, and publish a variety of works.

5-Citing references using various formats.

6—Interpreting charts/graphs, tables/schedules, diagrams/maps, and organizational charts/flowcharts.

Standard Six: Students read, analyze, and respond to literature as a record of life experiences.

1—Identifying, analyzing, and responding to United States and world literature that represents the experiences and traditions of diverse ethnic groups.

2—Analyzing distinctive elements of ancient, American, British, and world literature.

3—Identifying, analyzing, and responding to a variety of classic and contemporary literature from many genres.

4—Analyzing various genres as records of life experiences.

Standard Seven: Students apply reasoning skills to their reading, writing, speaking, listening, viewing, and visually representing.

1—Using comprehension strategies in all contexts.

2—Problem solving by analyzing, prioritizing, categorizing, and evaluating; incorporating life experiences; and using available information.

3—Analyzing the effects of an author's life, culture, and philosophical assumptions and an author's purpose and point of view.

4—Distinguishing fact from opinion, skimming and scanning for facts, determining cause and effect, generating inquiry, and making connections with real-life situations.

C. Mathematics

Number and Number Relations Strand (N): In problemsolving investigations, use estimation, mental arithmetic, number lines, graphs, appropriate models, manipulatives, calculators, and computers to help develop an intuitive understanding of the real number system and communicate the relationships within that system.

N.1—Demonstrating an understanding of number systems.

N.2—Demonstrating that a number can be expressed in many forms, and selecting an appropriate form for a given situation.

N.3—Using number sense to estimate and determine reasonableness of solutions.

N.4—Determining whether an exact or approximate answer is necessary.

N.5—Selecting and using appropriate computational methods for given situations.

N.6——Applying ratios and proportional thinking in a variety of situations.

N.7—Justifying reasonableness of solutions and verifying results.

Algebra Strand (A): In problem-solving investigations, use appropriate manipulatives, models, graphs, tables, and technology to develop the understanding of concepts and to explore the applications of algebra.

A.1—Demonstrating the ability to translate real world situations into algebraic expressions, equations, and inequalities.

A.2—Recognizing the relationship between operations involving real numbers and operations involving algebraic expression.

A.3—Using tables and graphs as tools to interpret algebraic expressions, equations and inequalities.

A.4—Solving algebraic equations and inequalities using appropriate techniques.

Measurement Strand (NI): In problem-solving investigations, use appropriate manipulatives and available technology to develop the understanding of the concepts, processes, and real-life applications of measurement.

M.1—Selecting and using appropriate units, techniques, and tools to measure quantities in order to achieve specified degrees of precision, accuracy, and error (or tolerance) of measurements.

M.2—Demonstrating an intuitive sense of measurement.

M.3—Estimating, computing, and applying physical measurement using suitable units.

M.4—Demonstrating the concept of measurement as it applies to real-world experiences.

Geometry Strand (G): In problem-solving investigations, use appropriate models, drawings, manipulatives, and technology to understand concepts and explore real-world applications of one-, two-, and three-dimensional geometry, and justify solutions.

G.1—Identifying, describing and comparing to explore and make conjectures about geometric concepts and figures.

G.2—Representing and solving problems using geometric models and the properties of those models.

G.3—Solving problems using coordinate methods, as well as synthetic and transformational methods.

G.4—Using inductive reasoning to predict, discover, and apply geometric properties and relationships.

G.5—Classifying figures in terms of congruence, similarity, and applying these relationships.

G.6—Demonstrating deductive reasoning and justification.

Louisiana Administrative Code

Data, Discrete Math, and Probability (D): In problemsolving investigations, use appropriate collecting and organizational techniques, manipulatives, and technology in order to discover trends, to formulate conjectures regarding cause-and-effect relationships, and to develop critical-thinking skills that enable the student to make informed decisions.

D.1—Designing and conducting statistical experiments that involve collecting and representing data in various forms.

D.2—Recognizing data that relates two variables as linear, exponential, or otherwise in nature.

D.3—Using simulations to estimate probability.

D.4—Demonstrating an understanding of the calculation of finite probabilities using permutations, combinations, sample spaces, and geometric figures.

D.5—Recognizing events as dependent or independent in nature and demonstrating techniques for computing multiple event probabilities.

D.6—Demonstrating the concept of distributions and recognizing normal and non-normal distributions.

D.7—Making inferences from data that are organized in charts, tables, and graphs.

D.8—Demonstrating logical thinking procedures such as flow charts and truth tables.

D.9—Using discrete math to model real-life situations.

Patterns, Relations, and Functions (P): In problemsolving investigations, use appropriate number sense, manipulatives, drawings, tables, graphs, symbolic formulas, and technology to organize information, recognize patterns which may develop, and use those patterns to make predictions.

P.1—Modeling the concepts of variables, functions, and relations as they occur in the real world and using the basic notations and terminology.

P.2—Translating between tabular, symbolic, and graphical representations of functions.

P.3—Recognizing behavior of elementary functions and using graphing technologies to represent them.

P.4—Analyzing the changes in the graphs of functions caused by changing the coefficients and constants of arbitrary functions using technology whenever appropriate.

P.5—Analyzing real-world relationships that can be modeled locally or globally by elementary functions.

D. Science

Science As Inquiry Strand (SI): Students do science by engaging in partial and full inquiries that are within their developmental capabilities.

Benchmark A: The Abilities Necessary to do Scientific Inquiry

1—Identifying questions and concepts that guide scientific investigations.

2—Designing and conducting scientific investigations.

3—Using technology to improve investigations and communications.

4—Formulating and revising scientific explanations and models using logic and evidence.

5—Recognizing and analyzing alternative explanations and models.

6—Communicating and defending a scientific argument.

7—Utilizing science safety procedures during scientific investigations.

Benchmark B: Understanding Scientific Inquiry

1—Understanding that scientists usually base their investigations on existing questions or causal/functional questions.

2—Understanding that scientists conduct investigations for a variety of reasons, such as exploration of new areas, discovery of new aspects of the natural world, confirmation of prior investigations, prediction of current theories, and comparison of models and theories.

3—Understanding that scientists rely on technology to enhance the gathering and manipulation of data.

4—Understanding that scientists must adhere to criteria such as: A proposed explanation must have a logical structure, abide by the rules of evidence, be open to questions and modifications, be based on historical and current scientific knowledge, and be adequately reported to enhance further investigations.

5—Understanding that results of scientific inquiry, new knowledge, and methods emerge from different types of investigations and public communication among scientists.

Physical Science Strand (PS): Students develop an understanding of the characteristics and interrelationships of matter and energy in the physical world

Benchmark A: Measurement and Symbolic Representation

1—Manipulating and analyzing quantitative data using the SI system.

2—Understanding the language of chemistry (formulas, equations, symbols) and its relationship to molecules, atoms, ions, and subatomic particles.

Benchmark B: Atomic Structure

1—Describing the structure of the atom and identifying and characterizing the particles that compose it (including the structure and properties of isotopes).

2—Describing the nature and importance of radioactive isotopes and nuclear reactions (fission, fusion, radioactive decay).

3—Understanding that an atom's electron configuration, particularly that of the outermost electrons, determines the chemical properties of that atom.

Benchmark C: The Structure and Properties of Matter

1-Distinguishing among elements, compounds, and/or mixtures.

2—Discovering the patterns of physical and chemical properties found on the periodic table of the elements.

3—Understanding that physical properties of substances reflect the nature of interactions among its particles.

4—Separating mixtures based upon the physical properties of their components.

5—Understanding that chemical bonds are formed between atoms when the outermost electrons are transferred or shared to produce ionic and covalent compounds.

6—Recognizing that carbon atoms can bond to one another in chains, rings, and branching networks to form a variety of structures.

7—Using the kinetic theory to describe the behavior of atoms and molecules during phase changes and to describe the behavior of matter in its different phases.

Benchmark D: Chemical Reactions

1—Observing and describing changes in matter and citing evidence of chemical change.

2—Comparing, contrasting, and measuring the pH of acids and bases using a variety of indicators.

3—Writing balanced equations to represent a variety of chemical reactions (acid/base, oxidation/reduction, etc.).

4—Analyzing the factors that affect the rate and equilibrium of a chemical reaction.

5—Applying the law of conservation of matter to chemical reactions.

6—Comparing and contrasting the energy changes that accompany changes in matter.

7—Identifying important chemical reactions that occur in living systems, the home, industry, and the environment.

Benchmark E: Forces and Motion

1—Recognizing the characteristics and relative strengths of the forces of nature (gravitational, electrical, magnetic, nuclear).

2—Understanding the relationship of displacement, time, rate of motion, and rate of change of motion; representing rate and changes of motion mathematically and graphically.

3—Understanding effects of forces on changes in motion as explained by Newtonian mechanics.

4—Illustrating how frame of reference affects our ability to judge motion.

Benchmark F: Energy

1—Describing and representing relationships among energy, work, power, and efficiency.

2—Applying the universal law of conservation of matter, energy, and momentum, and recognizing their implications.

Benchmark G: Interactions of Energy and Matter

1—Giving examples of the transport of energy through wave action.

2—Analyzing the relationship and interaction of magnetic and electrical fields and the forces they produce.

3—Characterizing and differentiating electromagnetic and mechanical waves and their effects on objects as well as humans.

4—Explaining the possible hazards of exposure to various forms and amounts of energy.

Benchmark H: Science and Technology

1—Developing an awareness and appreciation for the continuing progress in technology as it affects the quality of individual lives as well as of society in order to become better informed citizens and consumers.

2—Becoming computer literate and proficient as it applies to the computer's capability to acquire data (with sensors), interpret data (by graphing), and as a research tool (library and Internet).

Life Science Strand (LS): Students become aware of the characteristics and life cycles of organisms and understand their relationships to each other and to their environment.

Benchmark A: The Cell

1—Observing cells, identifying organelles, relating structure to function, and differentiating among cell types.

2—Demonstrating a knowledge of cellular transport.

3—Investigating cell differentiation and describing stages of embryological development in representative organisms.

Benchmark B: The Molecular Basis of Heredity

1—Explaining the relationship among chromosomes, DNA, genes, RNA, and proteins.

2-Comparing and contrasting mitosis and meiosis.

3—Describing the transmission of traits from parent to offspring and the influence of environmental factors on gene expression.

4—Exploring advances in biotechnology and identifying possible positive and negative effects.

Benchmark C: Biological Evolution

1—Exploring experimental evidence that supports the theory of the origin of life.

2—Recognizing the evidence for evolution.

3—Discussing the patterns, mechanisms, and rate of evolution.

4-Classifying organisms.

5—Distinguishing among the kingdoms.

6—Comparing and contrasting life cycles of organisms.

7—Comparing viruses to cells.

Louisiana Administrative Code

Benchmark D: Interdependence of Organisms

1—Illustrating the biogeochemical cycles and explaining their importance.

2—Describing trophic levels and energy flows.

3—Investigating population dynamics.

4—Exploring how humans have impacted ecosystems and the need for societies to plan for the future.

Benchmark E: Matter, Energy, and Organization of Living Systems

1—Comparing and contrasting photosynthesis and cellular respiration, emphasizing their relationships.

2—Recognizing the importance of the ATP cycle in energy usage within the cell.

3—Differentiating among levels of biological organization.

Benchmark F: Systems and the Behavior of Organisms

1—Identifying the structure and functions of organ systems.

2—Identifying mechanisms involved in homeostasis.

3—Recognizing that behavior is the response of an organism to internal changes and/or external stimuli.

4-Recognizing that behavior patterns have adaptive value.

Benchmark G: Personal and Community Health

1—Relating fitness and health to longevity.

2-Contrasting how organisms cause disease.

3—Explaining the role of the immune system in fighting disease.

4—Exploring current research on the major diseases with regard to cause, symptoms, treatment, prevention, and cure.

5—Researching technology used in prevention, diagnosis, and treatment of diseases/disorders.

Earth and Space Science (ESS)

Benchmark A: Energy in the Earth System

1—Investigating the methods of energy transfer and identifying the sun as the major source of energy for most of the Earth's systems.

2—Modeling the seasonal changes in the relative position and appearance of the sun and inferring the consequences with respect to the Earth's temperature.

3—Explaining fission and fusion in relation to the Earth's internal and external heat sources.

4—Explaining how decay of radioactive isotopes and the gravitational energy from the Earth's original formation generates the Earth's internal heat.

5—Demonstrating how the sun's radiant energy causes convection currents within the atmosphere and the oceans.

6—Describing the energy transfer from the sun to the Earth and its atmosphere as it relates to the development of weather and climate patterns.

7—Modeling the transfer of the Earth's internal heat by way of convection currents in the mantle which powers the movement of the lithospheric plates.

Benchmark B: Geochemical Cycles

1—Illustrating how stable chemical atoms or elements are recycled through the solid earth, oceans, atmosphere, and organisms.

2—Demonstrating Earth's internal and external energy sources as forces in moving chemical atoms or elements.

Benchmark C: The Origin and Evolution of the Earth System

1—Explaining the formation of the solar system from a nebular cloud of dust and gas.

2—Estimating the age of the Earth by using dating techniques.

3—Communicating the geologic development of Louisiana.

4—Examining fossil evidence as it relates to the evolution of life and the resulting changes in the amount of oxygen in the atmosphere.

5—Explaining that natural processes and changes in the Earth system may take place in a matter of seconds or develop over billions of years.

Benchmark D: The Origin and Evolution of the Universe

1—Identifying scientific evidence that supports the latest theory of the age and origin of the universe.

2—Describing the organization of the known universe.

3—Comparing and contrasting the sun with other stars.

4—Identifying the elements found in the sun and other stars by investigating the spectra.

5—Describing the role of hydrogen in the formation of all the natural elements.

6—Demonstrating the laws of motion for orbiting bodies.

7—Describe the impact of technology on the study of the Earth, the solar system, and the universe.

Science and the Environment Strand (SE): In learning environmental science, students develop an appreciation of the natural environment, learn the value of environmental quality, and acquire a sense of stewardship through involvement in community action. As consumers and citizens, they are able to recognize how personal, professional, and political actions affect the natural world.

Benchmark A: Ecological Systems and Interactions

1—Demonstrating an understanding of the functions of Earth's major ecological systems.

2—Demonstrating an understanding of the functions and values of Earth's major ecological systems.

3—Describing how habitat, carrying capacity, and limiting factors influence plant and animal populations (including humans).

4—Understanding that change is a fundamental characteristic of every ecosystem and that ecosystems have varying capacities for change and recovery.

5—Describing the dynamic interactions between divisions of the biosphere.

6—Describing and explaining the Earth's biochemical and geochemical cycles and their relationship to ecosystem stability.

7—Comparing and contrasting the dynamic interaction with the biosphere.

8—Analyzing evidence that plant and animal species have evolved physical, biochemical, and/or behavioral adaptations to their environments.

9—Demonstrating an understanding of influencing factors of biodiversity.

10-Explaining that all species represent a vital link in a complex web of interaction.

11-Understanding how pollutants can affect living systems.

Benchmark B: Resources and Resource Management

1—Comparing and contrasting the various types of renewable and nonrenewable resources and explaining the relationships between these resources and populations.

2—Explaining how natural resources affect humans and how humans affect natural resources.

3—Recognizing that people of the world consume disproportionate amounts of the Earth's resources, a factor of both population size and inequitable geographic or economic distribution of resources.

4—Demonstrating an understanding that resource management issues and environmental problems may arise when resource use is motivated by short-term goals instead of long-term consequences.

5—Comparing the benefits and the costs of various resource management methods.

6—Analyzing how management of resources requires that they be viewed from a global, as well as a local, perspective.

7—Recognizing that sustainable development is a process of change in which resource use, investment direction, technological development, and institutional change meet society's future as well as present needs.

Benchmark C: Environmental Awareness and Protection

1—Evaluating the dynamic interaction of land, water, and air and its relationship to living things in maintaining a healthy environment.

2—Evaluating the relationships between quality of life and environmental quality.

3—Investigating and communicating how environmental policy is formed by the interaction of

social, economic, technological, and political considerations.

4—Demonstrating that environmental decisions include analyses that incorporate ecological, health, social, and economic factors.

5—Analyzing how public support affects the creation and enforcement of environmental laws and regulations.

Benchmark D: Personal Choices and Responsible Actions

1—Demonstrating an understanding of the effects of personal choices and actions on the natural environment.

2—Describing how a healthy environment depends upon responsible human actions.

3—Analyzing how people are capable of reducing and reversing their negative impact on the environment through thinking, planning, educating, collaborating, and taking action.

4—Demonstrating that the most important factor in prevention and control of pollution is education and the resulting change in values, attitudes, and behavior patterns.

5—Explaining how responsible environmental decision making involves scientific and sociological research, consideration of value systems, investigation and evaluation of alternative, and long-term global perspectives.

6—Demonstrating a knowledge that environmental issues should be an international concern.

7—Recognizing that philosophies, objectives, and practices of various types of resource management are sometimes incompatible, often necessitating compromises and tradeoffs.

8—Recognizing that the development of accountability toward the environment is essential for the continued health of the planet.

9—Developing an awareness of personal responsibility as stewards of the local and global environment.

E. Social Studies

Geography Strand: Physical and Cultural Systems (G): Students develop a spatial understanding of the Earth's surface and the processes that shape it, the connections between people and places, and the relationship between man and his environment.

Benchmark A: The World in Spatial Terms

1—Using geographic representations, tools, and technologies to explain, analyze and solve geographic problems.

2—Organizing geographic information and answering complex questions by formulating mental maps of places and regions.

Benchmark B: Places and Regions

1—Determining how social, cultural, and economic processes shape the features of places.

2—Analyzing the ways in which physical and human characteristics of places and regions have affected historic events.

3—Analyzing the different ways in which physical and human regions are structured and interconnected.

4—Explaining and evaluating the importance of places and regions to cultural identity.

Benchmark C: Physical and Human Systems

1—Analyzing the ways in which Earth's dynamic and interactive physical process affect different regions of the world.

2—Determining the economic, political, and social factors that contribute to human migration and settlement and evaluating their impact on physical and human systems.

3—Analyzing trend in world population numbers, patterns, and predicting their consequences.

4—Analyzing the characteristics, distribution, and interrelationships of the world's cultures.

5—Describing and evaluating spatial distribution of economic systems and how they affect regions.

6—Analyzing how cooperation, conflict, and selfinterests impact social, political, and economic entities on Earth.

Benchmark D: Environment and Society

1—Evaluating the ways in which technology has expanded the human capability to modify the physical environment.

2—Examining the challenges placed on human systems by the physical environment and formulating strategies to deal with these challenges.

3—Analyzing the relationship between natural resources and the exploration, colonization, and settlement of different regions of the world.

4—Evaluating policies and programs related to the use of natural resources.

5—Developing plans to solve local and regional geographic problems related to contemporary issues.

Civics Strand: Citizenship and Government (C): Students develop an understanding of the structure and purposes of government, the foundations of the American democratic system, and the role of the United States in the world while learning about the rights and responsibilities of citizenship.

Benchmark A: Structure and Purposes of Government

1-Analyzing the necessity and purposes of politics and government.

2—Comparing and evaluating the essential characteristics of various systems of government and identifying historical and contemporary examples of each.

3—Explaining and evaluating issues related to the distribution of powers and responsibilities within the federal system.

4—Explaining the organization and functions of local, state, and national governments and evaluating their relationships.

5—Evaluating the role and importance of law in the American political system.

6—Examining the major responsibilities of the national government for domestic and foreign policy and explaining how government is financed through taxation.

7—Explain how government is financed through taxation.

Benchmark B: Foundations of the American Political System

1—Analyzing ideas and origins of American constitutional government and evaluating how this has helped to shape American society.

2—Explaining constitutional and democratic beliefs in American society and applying them to the analysis of issues of conflicting beliefs and principles.

3—Analyzing the nature of American political and social conflict.

4—Evaluating issues related to the differences between American ideals and the realities of American social and political life.

5—Evaluating the roles of political parties, campaigns, and elections in American politics.

6—Analyzing the historical and contemporary roles of associations and groups in local, state, and national politics.

Benchmark C: International Relationships

1—Analyzing how the world is organized politically and evaluating how the interaction of political entities, such as nation-states and international organizations, affects the United States.

2—Analyzing the major foreign policy positions of the United States and evaluating their consequences.

3—Evaluating the impact of American ideas and actions on the world and analyzing the effects of significant international developments on the United States.

Benchmark D: Roles of the Citizen

1—Evaluating and defending positions on issues regarding the personal, political, and economic rights of citizens.

2—Evaluating and defending positions regarding the personal and civic responsibilities of citizens in American constitutional democracy.

3—Explaining and evaluating the various forms of political participation that citizens can use to monitor and shape the formation and implementation of public policy.

4—Analyzing and evaluating the importance of political leadership, public service, and a knowledgeable citizenry to American constitutional democracy.

Economics Strand: Interdependence and Decision Making (E): Students develop an understanding of fundamental economic concepts as they apply to the interdependence and decision making of individuals, households, businesses, and governments in the United States and the world.

Benchmark A: Fundamental Economic Concepts

1—Analyzing the impact of the scarcity of productive resources and examining the choices and opportunity costs that result.

2—Analyzing the roles that production, distribution, and consumption play in economic decisions.

3—Applying the skills and knowledge necessary in making decisions about career options.

4—Comparing and evaluating basic economic systems.

5—Explaining the basic features of market structures and exchanges.

6—Analyzing the roles of economic institutions, such as corporations and labor unions, that compose economic systems.

7—Analyzing the roles of money and banking in an economic system.

8—Applying economic concepts to understand and evaluate historical and contemporary issues.

Benchmark B: Individuals, Households, Businesses, and Governments

1—Identifying factors that cause changes in supply and demand.

2—Analyzing how supply and demand, price, incentives, and profit influence production and distribution in a competitive market system.

3—Analyzing the impact of governmental taxation, spending, and regulation on different groups in a market economy.

4—Analyzing the causes and consequences of worldwide economic interdependence.

5—Evaluating the effects of domestic policies on international trade.

6—Analyzing Louisiana's role in the world economy.

Benchmark C: The Economy as a Whole

1—Explaining the meanings of economic indicators such as Gross Domestic Product, per capita GDP, real GDP, CPI, and unemployment rate.

2—Explaining how interest rates, investments, and inflation/deflation impact the economy.

3—Analyzing unemployment and income distribution in a market economy.

4—Explaining the basic concepts of United States fiscal policy and monetary policy and describing their effects on the economy.

History Strand: Time, Continuity, and Change (H): Students develop a sense of historical time and historical perspective as they study the history of their community, state, nation, and world. Benchmark A: Historical Thinking Skills

1—Applying key concepts, such as chronology and conflict, to explain and analyze patterns of historical change and continuity.

2—Explaining and analyzing events, ideas, and issues within a historical context.

3—Interpreting and evaluating the historical evidence presented in primary and secondary source.s

4—Utilizing knowledge of facts and concepts drawn from history and methods of historical inquiry to analyze historical and contemporary issues.

5—Conducting research in efforts to analyze historical questions and issues.

6—Analyzing cause/effect relationships.

Benchmark B: United States History

1—Analyzing the significant changes that resulted from interactions among the peoples of Europe, Africa, and the Americas.

2—Summarizing the process by which the United States was colonized and later became an independent nation.

3—Analyzing the development of the American constitutional system.

4—Tracing territorial expansion and reform movements in the United States.

5—Analyzing the origins, major events, and effects of the Civil War and Reconstruction.

6—Analyzing the development of industrialization and examining its impact on American society.

7—Describing the immigration and internal migration patterns that have occurred in the history of the United States and examining the cultural and social changes that have resulted.

8-Evaluating the significance of the Progressive Movement.

9—Analyzing the rise of the labor and agrarian movements.

10–Explaining the changing role of the United States in world affairs through World War I.

11–Analyzing the causes, developments, and effects of the Great Depression and the New Deal.

12-Analyzing the origins, events, and results of World War II.

13-Examining and summarizing key developments in foreign and domestic policies during the Cold War era.

14–Analyzing the economic, political, social, and cultural transformation of the United States since World War II.

15–Explaining the major changes that have resulted as the United States has moved from an industrial to an information society.

16–Analyzing developments and issues in contemporary American society.

17–Discussing and demonstrating an understanding of recent developments in foreign and domestic policies.

18–Discussing and demonstrating an understanding of recent developments in foreign and domestic policies.

Benchmark C: World History

1—Analyzing the development of early human communities and civilizations.

2—Making generalizations about the cultural legacies of both the ancient river and the classical civilizations.

3—Analyzing the origins, central ideas, and worldwide impact of major religious and philosophical traditions.

4—Summarizing the developments and contributions of civilizations that flourished in Europe, Asia, Africa, and the Americas.

5—Analyzing the consequences of the economic and cultural interchange that increasingly developed among the peoples of Europe, Asia, and Africa.

6—Analyzing the impact of transoceanic linking of all major regions of the world.

7—Analyzing the political, cultural, and economic developments and trends that resulted in the transformation of major world regions.

8—Explaining how the emergence of territorial empires in Europe, Asia, and Africa unified large areas politically, economically, and culturally.

9—Tracing the expansion of European power and economic influence in the world and examining the impact of this expansion on societies in Asia and the Americas.

10–Analyzing the impact that political revolutions and new ideologies had on societies around the world.

11–Evaluating the economic, political, and social consequences of the agricultural and industrial revolutions on world societies.

12–Analyzing the patterns of worldwide change that emerged during the era of Western military and economic domination.

13–Analyzing the causes and international consequences of World War I, World War II, and other 20th century conflicts.

14–Analyzing the international power shifts and the breakup of colonial empires that occurred in the years following World War II.

15-Explaining the worldwide significance of major political, economic, social, cultural, and technological developments and trends.

AUTHORITY NOTE: Promulgated in accordance with R.S.6(A)(10) and R.S. 17:10.

HISTORICAL NOTE: Promulgated by the Board of Elementary and Secondary Education, LR 29:2730 (December 2003).

§517. Implementing the Standards through FHA/HERO

NOTE: Throughout this document, the integration of FHA/HERO is denoted below the standard to which it is related.

A. Future Homemakers of America (FHA/HERO) is the national student organization that serves and supports family and consumer sciences education. At the heart of FHA/HERO is involvement in projects and activities that students plan, carry out and evaluate themselves. These projects create ideal opportunities for students to both develop and apply family and consumer sciences skills while demonstrating mastery of the standards. FHA/HERO projects' "end products," portfolios, project reports, skills demonstrations and more, offer relevant, authentic means to assess student learning. Through their FHA/HERO involvement, students sort out thoughts, analyze situations, set goals, interact with others, apply classroom knowledge and become leaders in today's and tomorrow's families, careers and communities. FHA/HERO members encounter situations through which they:

1. apply skills in family and consumer sciences, academics and communication;

- 2. accept responsibility;
- 3. experience leadership;

4. learn to plan, implement and evaluate individual and group action;

- 5. build relationships;
- 6. develop appreciation for diversity;
- 7. analyze and solve problems;
- 8. adapt to change;
- 9. explore careers;
- 10. establish positive career-related attitudes and habits.

B. FHA/HERO is an integral part of the family and consumer sciences education program. In the local school, chapter projects and activities stem from and enhance family and consumer sciences programs of study. FHA/HERO chapters give students expanded opportunities for knowledge application, leadership training, community involvement and personal growth. Many of these experiences occur during class time, while others may occur out of class.

C. FHA/HERO National Programs. Future Homemakers of America offers a variety of national programs to guide and motivate students as they develop projects related to the family and consumer sciences national standards.

D. FHA/HERO Program Support Resources. Future Homemakers of America offers materials to support all of its national programs, as well as handbooks, guides, activity sheets, audiovisuals, brochures, *The Adviser* newsletter, *Teen Times* magazine, and more. A complete list of resources created to support students and teachers in their FHA/HERO involvement is available in the annual *FHA/HERO Publications Catalog.* A free catalog is available on request from the Future Homemakers of America's national office.

E. Contact Information. For more information about how an FHA/HERO chapter can help implement and assess the family and consumer sciences standards, contact the
