

Grantee: Louisiana

Grant: B-08-DI-22-0001

October 1, 2024 thru December 31, 2024

Grant Number: B-08-DI-22-0001	Obligation Date: 04/27/2009	Award Date: 04/27/2009
Grantee Name: Louisiana	Contract End Date:	Review by HUD: Original - In Progress
Grant Award Amount: \$1,093,212,571.00	Grant Status: Active	QPR Contact: No QPR Contact Found
LOCCS Authorized Amount: \$1,093,212,571.00	Estimated PI/RL Funds: \$38,191,041.89	
Total Budget: \$1,131,403,612.89		

Disasters:

Declaration Number

FEMA-1792-LA

Narratives

Disaster Damage:

Hurricane Gustav caused major wind and flood damage throughout the state, from the southern coastal parishes through central and north Louisiana. Two weeks later, Hurricane Ike hit sending tidal surges across the State's southern coastal communities. Ike exceeded storm surge caused by hurricanes Rita and Katrina. More than 1.9 million Louisiana residents were forced to evacuate for hurricanes Gustav and Ike. Many of these residents were unable to return to their homes and jobs for a number of days, and a large number of residents whose homes remain unlivable continue to need short-term shelter and longer-term transitional housing. The State was forced to evacuate 30,000 critical transportation-need residents, including 10,400 medical evacuations. This represented the largest medical evacuation in U.S. history. The State was also left with 1.5 million cubic yards of debris from Hurricane Gustav along federal and state highways. Approximately 150,000 to 300,000 homes experienced some level of damage in the storm; more than 12,000 homes were flooded. Preliminary estimates show that approximately \$2 to \$7 billion in residential property loss was incurred. Even homes built to the Federal Emergency Management Agencies Advisory Base Flood Elevations flooded as a result of this storm. The state also estimates more than \$1 billion in public infrastructure damage. The state has spent more than \$400 million in emergency response and immediate recovery activities. Fifty-three (53) of the States sixty-four (64) parishes were included in the President's disaster declaration for individual assistance; all 64 parishes were declared for public assistance. The two storms caused tremendous damage, which, in turn, left most communities without electricity for days, and many for weeks. More than 120,000 homes received some damage.

Recovery Needs:

A large percentage of the State's educational facilities received damage from the storm. Preliminary estimates indicate that there was at least \$100 to \$150 million in damages to the primary (including pre-K) and secondary education facilities. While most of these repairs will be covered through FEMA's public assistance program, certain repairs or necessary rebuilds may be deemed ineligible through FEMA's program. Hurricanes Gustav and Ike impacted many of the State's port facilities resulting in large economic losses to the State and exposing the nation to large and significant economic impacts, from long-term disruptions as much of the nation's oil and gas, commodity and cargo traffic flows through south Louisiana facilities. While oil and gas enter the Nation through facilities in south Louisiana, many more commodities that are vital to the upper Midwest, and north and central Louisiana flow down the Mississippi River and are maintained at specific temperatures at port warehouse facilities along the Mississippi River before becoming exports. These raw products in turn employ thousands of Louisianans and create millions of dollars in economic value.

While the majority of public infrastructure repairs will be covered by FEMA programs, it is known from experience with the 2005 storms that there are certain costs of repair including improvements or rebuilding will be deemed ineligible for FEMA funding. Preliminary cost estimates for the repair of Federal Highway Administration (FHWA) eligible roads and bridges sustained as a result of Hurricane Gustav total \$127 million. Federal-aid highway damage estimates are about \$119 million.

While funding to address these damages is authorized under current law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical infrastructure. To repair this critical infrastructure, \$119 million would be needed for Louisiana (Gustav - \$53 million; Ike - \$66 million) through the Federal Highway Administrations Emergency Relief program.

Preliminary estimates indicate approximately \$1.7 billion in uninsured housing losses, with over half of that amount likely being homeowners. Hurricanes Katrina and Rita have taught us that repair costs generally outstrip insurance proceeds. Initial damage models based on flood and

wind damage vary widely, but have a midpoint between \$3 and 4 billion dollars. Half of this damage may be uninsured losses due to uninsured and underinsured properties.

With losses of housing stock concentrated in certain communities, Louisiana could have up to \$1.5 billion in uncompensated housing losses. Of this, the State will need to design programs in concert with local communities to rebuild and make up this loss. The State will develop the programs in concert with local communities to rebuild and make up this loss.

Based of the 2007 Summary of Agriculture and Natural Resources by the LSU Agriculture Center and NMFS Revenue Data, the seafood industries experienced nearly \$250 million in revenue loss as a result of the two storms. Even prior to hurricanes Gustav and Ike, Louisiana,s fisheries were struggling to recover from more than \$528 million in losses resulting from hurricanes Katrina and Rita in 2005. Hurricanes Gustav and Ike moved across the central Gulf of Mexico through some of the nation's most valuable and productive fishing grounds at the start of the state's most valuable shrimp season.

Overall Progress Narrative:

October 1, 2024 - December 31 2024

The State of Louisiana, Office of Community Development continued to move both projects and programs to completion. Total grant expenditures over the quarter were \$319,451.98. Program managers continue to work with grantees to reallocate remaining funds from completed projects and programs to existing programs or new initiatives. As the number of active state-run programs continue to decline, project and program managers focus on closing out the remaining projects and reallocating funds as programs reach completion.

Parish grantees continue to amend allocation budgets due to projects coming in under budget or acquiring other funding sources and other projects deemed no longer viable due to permitting or other issues. The budget reallocations are resulting in additional funds for existing projects being moved to priority status. Among approved parish projects representing more than \$553 million in funding, approximately 99.6% (or more than \$551 million) has been expended among 56 parish grantees.

Management and close-out staff continue to systematically track project completions and notify grantees that close-outs are due. As of the end of this quarter, 732 Gustav/Ike (G/I) activities have been closed. Close-out efforts at the local level are also enabling grantees to reallocate funds as needed to existing disaster recovery projects, in particular drainage, sewage and road repair that may require additional mitigation or adjustments once the work needed can be thoroughly assessed.

For all activities in the QPR with no narrative, there were no expenditures in this quarter.

Project Summary

Activity Description:

During intense rainfall events associated with hurricanes, upstream flooding is a real potential threat in these immediate watersheds. Hydraulic capacity of each of these bridges is considered to be inadequate. The bridges are not adequately sized to handle the large amounts of water associated with stream flooding and extreme rainfall. The accumulation of excess water at these undersized structures, immediately after Hurricane Gustav, caused water to back up resulting in significant flooding upstream and downstream of the bridges and along the roadside ditches. The installation of an adequately sized bridge would prevent this problem from occurring in the event of future floods or hurricanes. Majority of the areas drained through the channels that pass beneath these bridges are low to moderate income areas (LMI).

Location Description:

East Baton Rouge Parish

Activity Progress Narrative:

12/12/2024: Reduced budget and obligation by 266,948.38 (from 7,130,753.06 to 6,863,804.68, amount disbursed) to deobligate balance. kp

12/13/2024: Increased budget and obligation to process two outstanding PAE invoices. One invoice for \$10,745 and the other invoice for \$11,850 for a total of \$22,595. Budget and obligation changing from \$6,863,804.68 to \$6,886,399.68: Denise Fox
