MEMORANDUM OSRAP 21-15

TO: Fiscal Officers
All ISIS Agencies

FROM: Lindsay Schexnayder, CPA
State Accounting Systems Director

SUBJECT: 1099 Table Processing – Calendar Year 2020

The AFS 1099 Table will be updated during the December monthly close process on the night of January 6, 2021. This process will create the 1099 Table and BUNDL reports for the 2020 calendar year.

To enable Agencies to begin preparing for the generation of the 1099 forms, the ISIS reports 4G01 (1099 Turnaround Report) and the 4G02 (1099 Adjusting Transactions by Vendor Report) for calendar year 2020 through the November 2020 accounting period have been made available in current report section of BUNDL for your review under mail code “ISFGFS.” You are encouraged to review them and prepare to make any changes. The reports are sorted by the agency type used on the AFS AGC2 Table. The reports will be updated with December data on January 6, 2021.

Agencies should begin reviewing the December reports and process manual additions, changes, and deletions to their 1099 data on the morning of January 7, 2021, continuing through January 19, 2021. All manual adjustments must be entered in AFS by January 19, 2021.

Each Agency is responsible for retrieving and printing their portion of each report and ensuring that the information listed on the table and reports is correct. After reviewing the 1099 table and BUNDL reports, the Agency is responsible for making the necessary manual adjustments directly to the 1099 table.

The 1099 table will be created for all 1099 reportable payments, regardless of amount. When the 1099 table entries are processed to create the 1099 Forms on the morning of January 20th, a 1099 **will only be generated** for 1099 reportable vendors paid \$600 or more using 1099 reportable objects during the 2020 calendar year or for those vendors subject to backup withholding regardless of income amounts.

The 1099 forms will be emailed to your agency 1099 contact as an Adobe (.pdf) no later than January 25, 2021. If you cannot access the file or would prefer a hard copy of the file be sent to you, please contact the OSRAP Help Desk at 225.342.1097. Each 1099 should be printed on a single sheet of paper (8.5 x 11). **You (the Agency) are to print the 1099 forms, make a copy of the 1099 forms for your records, and mail the forms to the vendors on or before January 31, 2021.** The forms should be 'Z' folded and placed in a window envelope. Staples has a contract with the State to provide #10 window envelopes with the agency return address pre-printed on them. Information for this contract can be found by searching the Louisiana's Electronic Catalog (LA eCat) on the Office of State Procurement's website (<http://www.doa.la.gov/Pages/osp/Index.aspx>). You also have the option of producing labels for plain envelopes using Business Objects and/or word processing software.

The 1099's will include all transactions (payment vouchers, journal vouchers, manual warrants, check cancellations, cash receipts, etc.) in accounting periods 07 20 through 06 21 for payments made through December 31, 2020 and/or the transactions accepted in ISIS through January 6, 2021.

If you have paid another State Agency using their 1099 reportable vendor code and a 1099 reportable object code, you need to delete the 1099 Table entry. This also applies to payment vouchers that Agencies recorded to their own 1099 reportable vendor code.

The 1099 electronic file sent to the Internal Revenue Service (IRS) will be generated from the information on the 1099 Table as of the morning of January 20, 2021. If it is necessary to correct the 1099 information on or after January 20th, agencies are to mail the changes to OSRAP at the address below to the attention of Carrie Chen or you may e-mail the OSRAP Help Desk at OSRAP-HelpDesk@la.gov . **OSRAP will transmit all corrections to the IRS electronically.**

In order for the system to generate entries on the 1099 Table and the BUNDL reports, the following criteria must be met:

1. The agency type must exist on the AFS AGTP Table and a 1099 reportable master vendor record must exist for the FEIN associated with the agency type on the AGTP Table.
2. The vendor code that payments were issued to is 1099 reportable.
3. The payments were coded using a 1099 reportable object code.

4. The FEIN associated with the vendor has one and only one master vendor code.

MANUAL ADJUSTMENTS TO THE 1099 TABLE

For manual adjustments to the 1099 Table, you must first log on to ISIS/AFS regardless of which sub-system of ISIS generated the payment. All manual adjustments will require an entry on the 99TX Table of AFS before an entry is added, changed, or deleted from the 1099 Table. New entries to the 1099 Table require that the FEIN exist on the AFS MVEN Table. Agencies can request Vendors be changed to 1099 reportable and their master vendor indicator be changed to “Y” during the period of January 7, through January 19, 2021. **OSRAP will not change a vendor to non-1099 reportable or change a vendor’s master vendor indicator to “N” during the period of January 7 through January 19, 2021. These changes cannot be made after the 1099 table is created because it will cause the 1099 process on January 20 to fail. These types of Vendor change requests will only apply to calendar year 2021 and will be held until after the calendar year 2020 1099 process is completed. After the 1099 process is completed on January 20, the AFS 1099 tables for Calendar Year 2020 cannot be changed.**

Adding Text to the 99TX Table

1. Type “N” in the ACTION and type “99TX” in the SCREEN. Hit <ENTER>.
2. Type “A” in the ACTION and enter the following data in the corresponding fields:
 - a. YR – 2 digits. Enter “20” for calendar year 2020.
