PROGRAM ACTIVITY:

Care Management/Administration - MHSD, serving as the planning body, implements a single point-of-entry care management system that bridges the current gap between inpatient and outpatient behavioral health and developmental disabilities services, assessing the consumer's broad needs, planning and linking the individual to resources to assure access to medical and behavioral health care, and partnering with other community based providers to increase consumer choice around housing and other supportive services. This work will be supported by creating an administrative structure that is efficient, equitable, effective/evidence-based, patient-centered, safe, and timely.

Intellectual/Developmental Disabilities - This activity focuses on providing cost effective, community based services and supporting the continued de-institutionalization of individuals with developmental disabilities. Examples of these supports can include: identification of work and supports to maintain work, assisting with maintaining a household, such as paying bills, and assisting with learning hobbies.

Adult Behavioral Health Services - This activity focuses on improving coordination of services across the outpatient continuum of care for adults with behavioral health problems. MHSD has redesigned its clinic based structure so that mental health and addictive disorder services are integrated for the clients. MHSD will continue to focus its efforts on working with the hand-off between the inpatient and outpatient settings and ensuring that the necessary transitional services are available for these high risk clients. And third, MHSD will expand services available to clients as it continues to build out a comprehensive continuum of care.

Child and Adolescent Behavioral Health Services - This activity focuses on improving the coordination of services across the outpatient continuum of care for children and youth with behavioral health problems. MHSD will continue its re-design of the clinic based delivery system so that mental health and addictive disorder services are integrated for the clients. MHSD will continue to focus its efforts on working with the hand-off between the inpatient and outpatient settings and ensuring that the necessary transitional services are available for these high risk clients. Explanatory Notes: Explanatory Note: Third Next Available Appointment (3NAA) is an industry accepted quality indicator that reports the length of time in days between the day a person served makes a request for an appointment with a provider and the third available appointment. The MHSD appointment categories monitored are assessment and continuity of care. The specific appointment types monitored are psychosocial assessments, psychiatric evaluations, aftercare transfers, new medication management, and routine medication management. Patient clinical access to services is crucial to the growth of behavioral health services. The MHSD recognized the need to reliably measure access and benchmark performance. By ensuring timely appointment access, MHSD aims to avoid delays which can be harmful to those seeking care. Our efforts are focused on developing highly efficient scheduling systems that can meet the needs of our persons served and their families. 3NAA is a good indicator of the successful balance between capacity and demand in the system. High 3NAA indicates a clogged and backlogged system.
